INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/US2004/020108

_		
_	Box	No. I Basis of the report
1.	 With regard to the language, this report is based on the international application in the language in which indicated under this item. 	
		his report is based on translations from the original language into the following language , which is the language of a translation furnished for the purposes of:
	ר	international search (under Rules 12.3 and 23.1(b)) publication of the international application (under Rule 12.4) international preliminary examination (under Rules 55.2 and/or 55.3)
2.	With have	regard to the elements* of the international application, this report is based on (replacement sheets which been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this tas "originally filed" and are not annexed to this report):
	Desci	iption, Pages
	1-25	as originally filed
	Claim	s, Numbers
	1-68	as originally filed
	Drawi	ngs, Sheets
	1/9-9/9	as originally filed
		sequence listing and/or any related table(s) - see Supplemental Box Relating to Sequence Listing
3.		he amendments have resulted in the cancellation of:
	L.	the description, pages the claims, Nos.
		the drawings, sheets/figs the sequence listing <i>(specify)</i> :
		any table(s) related to sequence listing (specify):
	Suppl	his report has been established as if (some of) the amendments annexed to this report and listed below been made, since they have been considered to go beyond the disclosure as filed, as indicated in the
		the description, pages the claims, Nos.
		the drawings, sheets/figs
		the sequence listing (specify): any table(s) related to sequence listing (specify):
		item 4 applies, some or all of these sheets may be marked "superseded "

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/US2004/020108

Concerning point V

Preliminary considerations

The applicant's attention is drawn to the fact that one european document (EP1349179=D4) published between the claimed priority date and the filing date of the present application was found. This document would be considered as document according to Art. 54(3) EPC in the European Phase. In order to allow the examining division to check whether D4 is a Art. 54(2) EPC or a Art. 54(3) EPC document, the applicant is requested to send a copy of the priority document.

Claim 54

Claim 54 defines the broadest subject-matter of the application. It relates to a CNT-elastomer composite comprising functionalized CNTs in an elastomeric matrix. This is not new in view of:

D1 (see cl. 1&2; paragraph [31] which indicates that the surface of the CNT is preferably pretreated, which means functionalized),

D2 (see cl. 11&97; p. 3, l. 35-37; p.18, l. 27-37),

D3 (see cl. 1 and paragraph [18]).

The subject-matter of claim 54 is thus not novel (Art. 33(2) PCT).

Claim 1

The method of claim 1 is not new in view of D1, which teaches a similar method where the pretreated CNT and the matrix are hardened after mixing (see cl. 8). The same applies for D2 (see fig. 21 for ex.; also p. 19, l. 27-32).

Claim 25

The method of claim 25 is not new in view of D1 (see paragraph [29]) where use of surfactant and hardener is strongly recommanded (see also cl. 8)).

Claim 41

The method of claim 41 is not new in view of D4 (see paragraph [26] which teaches

dispersion in a solvent followed by evaporation.

Providing an amended main claim which meets the requirements of Art. 33(2) PCT, the applicant should relate the distinguishing feature to a surprising (unexpected) technical effect or make credible or plausible that the distinguishing feature is not derivable from the prior art teaching.
